

**In The Claims:**

Please replace the previously presented claim set with the following replacement claim set:

1-8. (Cancelled)

9. (Previously Presented) An aqueous agrochemical composition comprising at least one agrochemical, one or more foam-inducing surfactants and a water-insoluble liquid silicone-containing antifoam agent, wherein the water-insoluble liquid silicone-containing antifoam agent is incorporated into the composition as a solution in an organic solvent comprising at least one member selected from alkyl esters, aralkyl esters and aryl esters of organic acids, wherein the water-insoluble liquid silicone-containing antifoam agent is present in the organic solvent at a concentration of at least 10% by weight.

10-13. (Cancelled)

14. (Previously Presented) An aqueous composition according to claim 9 wherein the water-insoluble liquid silicone-containing antifoam agent comprises a polyalkylsilicone.

15. (Previously Presented) An aqueous composition according to claim 14 wherein the water-insoluble liquid silicone-containing antifoam agent further comprises hydrophobic silicas.

16. (Original) An aqueous composition according to claim 9 wherein the organic solvent has a flash point of greater than 40°C.

17. (Cancelled)

18. (Previously Presented) An aqueous composition according to claim 9 wherein the organic solvent comprises at least one member selected from the group consisting of isopropyl myristate, butyl cocoate and butyl laurate.

19. (Original) An aqueous composition according to claim 9 further comprising a bioperformance enhancing agent.

20. (Previously Presented) An aqueous composition according to claim 9 wherein the agrochemical comprises at least one water-soluble agrochemical.

21. (Previously Presented) An aqueous concentrate composition comprising an agrochemical, one or more foam-inducing surfactants and a water-insoluble liquid silicone-containing antifoam agent, wherein the water-insoluble liquid silicone-containing antifoam agent is incorporated into the composition as a solution in an organic solvent comprising at least one member selected from alkyl esters, aralkyl esters and aryl esters of organic acids, and wherein the organic solvent is selected such that a density of the solution of the water-insoluble liquid silicone-containing antifoam agent in the organic solvent differs from a density of the aqueous concentrate composition measured in the absence of the organic solvent and water-insoluble liquid silicone-containing antifoam by not more than 0.1 g/l density units, all density measurements being conducted at room temperature.

22. (Original) An aqueous concentrate composition according to claim 21 wherein the agrochemical comprises at least one water-soluble agrochemical.

23. (Previously Presented) An aqueous composition comprising an agrochemical, one or more foam-inducing surfactants and a water-insoluble liquid silicone-containing antifoam agent, wherein the water-insoluble liquid silicone-containing antifoam agent is incorporated into the composition as a solution in an organic solvent, wherein the organic solvent is an alkyl ester, aralkyl ester or aryl ester of an organic acid, wherein said ester (a) contains the water-insoluble liquid silicone-containing antifoam at a concentration of greater than 12% by weight; (b) provides a solution of the water-insoluble liquid silicone-containing antifoam having a density of greater than 0.8 g/ml; and (c) has a flash point of greater than 40°C.

24. (Currently Amended) A method of reducing foaming of an aqueous agrochemical composition comprising at least one agrochemical, said method comprising introducing a water-insoluble liquid silicone-containing antifoam into the composition in the form of a solution in an organic solvent comprising at least one member selected from alkyl esters, aralkyl esters or aryl esters of organic acids, wherein the water-insoluble liquid silicone-containing antifoam agent is present in the organic solvent at a concentration of at least 10% by weight.

25. (Currently Amended) A method for reducing or eliminating separation of a water-insoluble liquid silicone-containing antifoam in an aqueous agrochemical composition comprising at least one agrochemical, said method comprising introducing a water-insoluble liquid silicone-containing antifoam into the aqueous agrochemical composition in the form of a solution in an organic solvent comprising at least one member selected from alkyl esters, aralkyl esters and aryl esters of organic acids, wherein the water-insoluble liquid silicone-containing antifoam agent has a solubility in the organic solvent of at least 10% by weight at a temperature in the range of 15-20°C.

26. (Previously Presented) The method according to claim 25 wherein the solution of the water-insoluble liquid silicone-containing antifoam in the solvent is added directly to the aqueous agrochemical composition, and wherein the water-insoluble liquid silicone-containing antifoam agent is present in the organic solvent at a concentration of at least 10% by weight.

27. (Previously Presented) The method according to claim 25 wherein the solution of water-insoluble liquid silicone-containing antifoam in the solvent is pre-emulsified into water prior to incorporation into the aqueous agrochemical composition, and wherein the water-insoluble liquid silicone-containing antifoam agent is present in the organic solvent at a concentration of at least 10% by weight.

28. (Currently Amended) An aqueous ~~concentrate~~ composition according to claim 1 2, further comprising an emulsifying agent.

29. (Currently Amended) An aqueous ~~concentrate~~ composition according to claim 28, wherein the emulsifying agent comprises a sorbitan alkyl ester, a polyoxyethylene sorbitan alkyl ester, an alkylphenol ethoxylate, an alcohol alkoxylate, a block co-polymer, a fatty acid alkoxylate, an alkylpolyglycoside, an alkaline metal alkylbenzene sulfonate, or any blend thereof.

30. (Cancelled)

31. (Currently Amended) An aqueous ~~concentrate~~ composition according to claim ~~30~~ 19, wherein the bioperformance enhancing agent comprises an alkylpolyglycoside.

32. (Currently Amended) An aqueous ~~concentrate~~ composition according to claim ~~4~~ 9, further comprising a polysaccharide additive.

33. (Currently Amended) An aqueous concentrate composition according to claim 21, wherein the water-insoluble liquid silicone-containing antifoam agent is present in the organic solvent at a concentration of at least 10% by weight.

34. (New) An aqueous concentrate composition according to claim 9, wherein said at least one agrochemical comprises at least one member selected from glyphosate, paraquat, diquat, dicamba, fomesafen, imazethapyr, imazaquin, imazapyr, 2,4-D and glufosinate.

35. (New) An aqueous concentrate composition according to claim 21, wherein said agrochemical comprises glyphosate, paraquat, diquat, dicamba, fomesafen, imazethapyr, imazaquin, imazapyr, 2,4-D or glufosinate.

36. (New) An aqueous concentrate composition according to claim 23, wherein said aqueous composition, prior to addition of said solution of the water-insoluble liquid silicone-containing antifoam, has a density ranging from above 1 g/ml to 1.4 g/ml.

37. (New) An aqueous concentrate composition according to claim 36, wherein said

agrochemical comprises glyphosate, and said aqueous composition, prior to addition of said solution of the water-insoluble liquid silicone-containing antifoam, has a density ranging from 1.2 g/ml to 1.4 g/ml.

38. (New) The method of claim 24, wherein the at least one agrochemical comprises at least one member selected from glyphosate, paraquat, diquat, dicamba, fomesafen, imazethapyr, imazaquin, imazapyr, 2,4-D and glufosinate, and the organic solvent comprises at least one member selected from isopropyl myristate, butyl cocoate and butyl laurate.

39. (New) The method of claim 25, wherein the at least one agrochemical comprises at least one member selected from glyphosate, paraquat, diquat, dicamba, fomesafen, imazethapyr, imazaquin, imazapyr, 2,4-D and glufosinate, and the organic solvent comprises at least one member selected from isopropyl myristate, butyl cocoate and butyl laurate.

40. (New) An aqueous agrochemical composition comprising at least one agrochemical, one or more foam-inducing surfactants and a water-insoluble liquid silicone-containing antifoam agent, wherein the water-insoluble liquid silicone-containing antifoam agent is incorporated into the composition as a solution in an organic solvent comprising at least one member selected from isopropyl myristate, butyl cocoate and butyl laurate, wherein the water-insoluble liquid silicone-containing antifoam agent is present in the organic solvent at a concentration of at least 10% by weight, said at least one agrochemical comprising at least one member selected from glyphosate, paraquat, diquat, dicamba, fomesafen, imazethapyr, imazaquin, imazapyr, 2,4-D and glufosinate.

41. (New) An aqueous composition according to claim 40, further comprising a bioperformance enhancing agent comprising an alkylpolyglycoside.
